In the event of any conflict between any content in this document, any document referenced herein, any exhibit to this document, or any communications concerning this document, and any content in the *Visa Core Rules and Visa Product and Service Rules*, the *Visa Core Rules and Visa Product and Service Rules* shall govern and control.

Visa Merchant Data Standards Manual – Summary of Changes for this Edition

This is a global document and should be used by members in all Visa Regions.

In this edition, details have been added to include the following new MCC has been created:

MCC 3169 – RIYADH AIR

The following amendments were also incorporated to facilitate easier merchant designation and classification:

Various updates have been included to support greater transparency into non-fiat currency (for example: Cryptocurrency) and non-fungible token (NFT) transactions, and to support Visa's new Ramp Provider program.

Introduction

The *Visa Merchant Data Standards Manual* contains requirements for Merchant/payment facilitator/marketplace classification, location, and various data elements, including Merchant location, Merchant Category Codes (MCC), and other VisaNet data formats.

Section 1: Merchant Data Requirements

This section contains requirements for assigning and formatting the following data elements:

- Merchant name
- Merchant location, Payment Facilitator location, Digital Wallet Operator location, Marketplace location (including city, state, and country formats) and Ramp Provider location.
- Supplementary Merchant information
- Merchant Category Code (MCC)

Merchant data must be the same as, or consistent with, comparable data throughout a transaction's life cycle and on the transaction receipt. Visa retains the right to require corrections to non-compliant or confusing Merchant data.

Determining a Merchant Name

General requirements	The Merchant name is the most important factor in cardholder recognition of transactions. Correct use helps to minimize copy requests resulting from unrecognizable Merchant names and reduces costs to Acquirers, Issuers and Merchants. The Merchant name must be the name most prominently displayed by the Merchant and by which cardholders recognize the Merchant (while also reflecting the Merchant’s “Doing Business As” (DBA) name). Merchants may sometimes use names that do not cause confusion when viewed at the Merchant premises but may confuse the cardholder if viewed out of context on a cardholder statement. Examples of such names would include a parking garage named John’s Farm (that is no longer the site of a farm) or a restaurant named Ship Chandler. When the content of the Merchant name is inconsistent with the MCC, the Merchant name must contain extra information that identifies the type of Merchant to the cardholder. In the example above, the Merchant descriptor for John’s Farm must be John’s Farm Parking; the descriptor for Ship Chandler must be Ship Chandler Restaurant. A Merchant with multiple Merchant outlets may add the city, store number, or other unique identifier to distinguish the specific Merchant outlet. Example One: A fuel station is a franchisee of a large retail chain. Accordingly, the retail chain name, brand, and colors are prominently displayed on the forecourt and inside the shop. The name of the franchisee is in the window on an A4 notice for legal reasons. The Merchant name must be the name of the retail chain, possibly with an added indication of the location. Example Two: An individual owns a taxicab that he leases to other drivers to provide taxi services as part of a large taxi company chain. The taxicab displays the taxi company name and is painted in the company’s colors. The driver leasing the taxi has his own acceptance contract. For legal reasons, that driver’s name is on a plate on the dashboard. The Merchant name must be the name of the taxi company, possibly with the taxicab number to differentiate it from other taxis that provide services for the same company. The Merchant name must not be the name of the taxi driver, nor may it be the name of the owner of the car. Example Three: A magazine offers annual subscriptions through postcards inserted in every issue. Although the magazine is one of several published by the same company, the publisher is not mentioned on the postcard. The Merchant name must be the name of the magazine, as that is the name that was displayed to the cardholder. It may only be the name of the publishing house if the publisher was clearly shown on the postcard as the Merchant.
Payment Facilitators, Marketplaces and Ramp Providers	A Merchant is an entity that represents itself to the buyer as selling services or goods. If an entity handles payments on behalf of sellers through an online marketplace that brings together multiple buyers and sellers it may be classified as a Marketplace. An entity is a Payment Facilitator if it deposits transactions or receives settlement on behalf of the Merchant but does not sell goods or services to cardholders and cannot otherwise be categorized as a Marketplace.

An entity is a Ramp Provider if it provides payment services to convert transactions from a fiat currency to a non-fiat currency (for example: cryptocurrency), or vice versa. A Ramp Provider may sell non-fiat currency to Cardholders directly or provide their services under a contract to Conversion Affiliates.

In determining whether an entity is a Merchant, Payment Facilitator, Marketplace or Ramp Provider Visa looks at each transaction separately. There are a number of entities that operate as the Merchant for some transactions and operate in a different capacity for other transactions. Such entities must process each transaction according to the rules that apply to the type of transaction.

Franchise:

ABC Inc. owns the franchise for The Ultimate Hamburger. ABC's name is displayed on a printed sheet of paper in the office window, per government requirements. Everything else—including the large sign in corporate colors outside the shop, the menu boards, and the staff uniform—displays the Ultimate name. ABC's location is indistinguishable from locations owned and run by Ultimate and locations owned by other franchisees. Any disputes are resolved with cardholders by Ultimate's head office. To cardholders, Ultimate is representing itself as selling the goods. Ultimate qualifies as the Merchant.

Department Store:

DJS is a department store and leases some areas on its ground floor to perfume companies that own the perfume they sell. The signage outside the shop is DJS, and the entire store is in their corporate design and color. A customer can take goods from any counter and pay for them at any cash register in the store. The customer sees the perfume brand being sold at a unique counter in the store, but they also see unique counters for different brands of jeans, which are owned and sold by DJS. Any disputes are resolved with cardholders by DJS customer service division. For the purpose of the test, DJS is representing itself to the cardholder as selling all the goods in the store, and DJS qualifies as the Merchant.

Online Marketplace (1):

Corriedale's runs an online marketplace specializing in sales to sheep farmers. There are several hundred sellers represented on the website, some are major Retailers and some are individual sellers. Corriedale does not purchase or supply the goods. Customers using the website can search for a specific item or a specific seller. In each case, the names of the Retailers are clearly displayed along with the price of the goods (which can vary by Retailer), and ratings assigned by customers. The look and feel of each web page remains that of Corriedale. It is possible to combine and pay for goods from multiple Retailers in the same transaction. Corriedale handles the payments for sales and chargebacks and sets the returns policy, but customer disputes are handled by individual Retailers. Corriedale has in place a process for resolving disputes between cardholders and retailers. Corriedale is not a Merchant—the Retailers on the site represent themselves as the sellers of the goods, and not Corriedale. Corriedale must register with Visa as a Marketplace.

Online Marketplace (2)

Specialist Parts of Munich (SPoM) is an online marketplace that brings together buyers and sellers of vintage car and truck parts in a single location. Sellers must arrange their own payments, and often choose to use a Payment Facilitator with which the marketplace

has a referral agreement. Sellers may choose their own Acquirer or a different Payment Facilitator.

SPoM does not qualify as a Marketplace, as it does not handle payments on behalf of its sellers. The Payment Facilitator with which it has a referral agreement is also not a Marketplace, as its primary function is to facilitate payments; it does not bring together buyers and sellers nor fill many of the other marketplace criteria.

Ramp Provider (1)

Ramp Provider X is a Ramp Provider that allows cardholders to use their Visa card to acquire Bitcoin (BTC). After having their identity verified, Cardholders are then able to input their card information and provide instructions for where the BTC should be delivered (i.e., their digital Wallet Address). Ramp Provider X facilitates conversion of the fiat currency from the Cardholder’s card into BTC and sending of the BTC to the Destination Wallet Address provided by the Cardholder. The Cardholder now has Bitcoin in their digital wallet to use for whatever they choose.

Ramp Provider (2)

Ramp Provider Y is a Ramp Provider that allows cardholders to use their Visa card to pay for items on NFTMarketplace.com, an affiliate website which prices its NFTs in Ethereum (ETH) instead of fiat currency (e.g., US Dollars). After having their identify verified, Cardholders are then able to input their card information and provide instructions for where the NFT Z should be delivered (i.e., their Digital Wallet Address). Ramp Provider Y facilitates conversion of the transaction from the fiat currency from the Cardholder’s card into ETH, sends the ETH to NFTMarketplace.com and then NFTMarketplace.com sends the NFT Z to the Destination Wallet Address provided by the Cardholder.

Note: All example names are fictitious.

Formatting the Merchant Name

Visa authorization and clearing systems provide 25 spaces in which to describe the Merchant name and acquirers are required to be able to use all 25 spaces. Merchant names longer than 25 characters (this includes letters, blank spaces, and all symbols) will not fit into the Merchant name field and must be abbreviated (but not just truncated after the 25th character). Information in the Merchant name field must enable the cardholder to accurately identify the specific Merchant, and the part of the name that uniquely identifies the Merchant to the cardholder must not be abbreviated. This is shown in the example below:

Name: NEW YORK HOME HARDWARE DISTRIBUTORS (35 characters)
Possible abbreviations:

N	Y		H	O	M	E		H	A	R	D	W	A	R	E		D	I	S	T	R	.			
N	E	W		Y	O	R	K		H	O	M	E		H	D	W		D	I	S	T	R	.		

Supplementary Merchant Name Information for

In general, the Merchant name field must only contain the Merchant name, as set out above. However, there are a number of specific exceptions to this rule in the table below.

Note: even for the categories set out below, supplementary data is not permitted if it makes the content of the Merchant name field confusing or counter to other requirements

Specific Transactions

(such as abbreviation requirements). In some cases, the Merchant name may not be truncated at all.

The supplemental data must be static and must appear in all transactions. For example, if a Merchant outlet chooses to include a location descriptor in the Merchant name field, it must be the same in every transaction. Two exceptions to this rule are airline/US railway ticket numbers and the words “No Show”, which need only appear in no show transactions.

If a Merchant with multiple Merchant outlets chooses to include a location descriptor in the Merchant name field. It must use the same type of information (for example, city name) for all its outlets. It must not add the city name for some outlets, the store number for some outlets and no information for others.

Transaction	Supplementary Data	Required/Optional																						
Ramp Provider	A Ramp Provider transaction that contains the Ramp Provider and Conversion Affiliate identifiers must populate the Merchant name field with a combination of both the Affiliate and Ramp Provider name, using (i) the name of the Ramp Provider (or an abbreviation), (ii) followed by an asterisk (*), and (iii) the Affiliate name (e.g. Ramp Provider*Affiliate Name). If a Cardholder accesses the website and/or application of a high-integrity risk Affiliate and is then linked or forwarded to the website and/or application of a high-risk Ramp Provider for payment, the name of the high-risk Ramp Provider must appear in the Merchant name field in conjunction with the name of the high-integrity risk Affiliate. The Ramp Provider name can only appear on its own when it's operating as a merchant i.e., selling currency directly to a self-custody wallet user. If it's processing on behalf of another seller, the seller's name must be there and should follow PF rules in this scenario.	Required																						
For the first recurring transaction at the end of a trial period, discounted introductory offer, or promotional period	After the Merchant name, may contain language to indicate that the recurring transaction is as a result of a subscription that began with a trial period, discounted introductory offer, promotional period, etc. For example: in English, this may be any of the following: • “End Trial” • “End Offer” • “End Free Trial” • “End Trial Period” • “End Discount” • Other similar language Merchants may use other language or transaction-specific details (for example, universal resource locator (URL) or order number) to help the cardholder identify that their trial period, discounted introductory offer or promotional period has ended, and that the regular price now applies for the subscription. For example: <table><tr><td>M</td><td>E</td><td>R</td><td>C</td><td>H</td><td>A</td><td>N</td><td>T</td><td>N</td><td>A</td><td>M</td><td>E</td><td>E</td><td>N</td><td>D</td><td></td><td>T</td><td>R</td><td>I</td><td>A</td><td>L</td><td></td></tr></table>	M	E	R	C	H	A	N	T	N	A	M	E	E	N	D		T	R	I	A	L		Optional
M	E	R	C	H	A	N	T	N	A	M	E	E	N	D		T	R	I	A	L				
Purchase of goods or services at an airline or US passenger railway (“ancillary	A general description of the type of purchase (beverage, meals, seat upgrade, lounge access, duty free etc). Information in the Merchant name field must use the following format: • Merchant name in the first 11 or 12 positions • A blank in position 12, if applicable • A general description of the goods or services beginning position 13 For example:	Optional																						

<i>purchase")</i>	A	I	R	L	I	N	E	N	A	M	E	D	U	T	Y	-	F	R	E	E				
Purchase of an airline ticket or US passenger railway ticket	Must contain all of the following: - An abbreviated airline (or US railway) name in the first 11 or 12 positions - A blank in position 12 if applicable - Airline (or US railway) ticket identifier beginning position 13 For example: A I R L I N E N A M E 1 2 3 4 5 6 7 8 9 0 1 2 3																				Required			
Purchase at an AFD	Most fuel is sold under large retail brands, and that brand must be the Merchant name. Since the brand often has multiple locations in a city, the Merchant is likely to include a place descriptor such as a city name or a location number. The required Merchant name must not be abbreviated or truncated in order to place supplemental information into the Merchant name field. For example: B I G B R A N D P E T R O L # 3 2 2																				Required			
Purchase of Goods or Services	Additional information may be included after the Merchant name and an asterisk (*) to indicate an order number, reference number, or other information to identify the transaction. If the transaction is an installment transaction, installment information (1 of 2, 2 of 2, etc.) must appear after the asterisk. For vehicle rental and hotel Merchants, the Merchant name must not be truncated in order to place supplemental information into the Merchant name field.																				Optional			
Cash	For a manual cash disbursement at a member location, the disbursing member's name must appear first, followed by the disbursing location's branch, office number, or other unique identifier. G R E A T B A N K W E S T E N D For an automated cash disbursement at a member location, a transaction descriptor such as "cash" must be used, and at least one of the following: - Disbursing member name - Name of the disbursing member's affiliated domestic, regional, or national network - The 3-digit servicing carrier code and a 10-digit transmission control network, excluding the check digit - A 3-digit carrier number, 3-digit form number, and 7-digit serial number, excluding the check digit B A N C O L O M B I A C A S H B A N C O L C A S H 1 2 3 1 2 3 4 5 6 7 8 9 0																				Required			
Original Credit Transactions	As required by the Visa Direct Original Credit Transaction (OCT) Global Implementation Guide																				Required			
No-Show Transactions	May also include the words "NO SHOW" after the Merchant name.																				Optional			
Payment Facilitator	A payment facilitator transaction that contains the Payment Facilitator and sponsored Merchant identifiers may populate the Merchant name field with either the sponsored Merchant name (alone), or a combination of both the sponsored Merchant and Payment Facilitator name, using (i) the name of the Payment Facilitator (or an abbreviation), (ii) followed by an asterisk (*), and (iii) the sponsored Merchant name (e.g., Payment facilitator name*Sponsored																				Required			

	Merchant name). It should choose the name that is the more recognizable to the cardholder. If a Cardholder accesses the website and/or application of a high integrity risk Merchant or a high integrity risk sponsored Merchant and is then linked or forwarded to the website and/or application of a high-risk internet Payment Facilitator for payment, the name of the high-risk internet Payment Facilitator must appear in the Merchant name field in conjunction with the name of the high integrity risk sponsored Merchant. Acquirers must prohibit agents from utilizing dynamic Merchant descriptors for Gambling Merchants.	
Staged Digital Wallet	For funding transactions, the Merchant name field must contain the name of the digital wallet Operator. For back-to-back funding transactions, the Merchant name field must contain (i) the name of the digital wallet Operator, (ii) followed by an asterisk (*), and (iii) the Retailer name.	Required
Marketplace	The Marketplace may use the Marketplace name alone. It may choose to insert the name of the seller into the Merchant name field, using (i) the name of the Marketplace (or an abbreviation), (ii) followed by an asterisk (*), and (iii) the Retailer name.	Required
Business Payment Solution Provider (BPSP)	The BPSP name must appear with the Supplier name. The BPSP name must be the Merchant name it registered with Visa. The complete name should appear. An abbreviation may be used for long names, but it must be easily recognizable. The field must contain (i) the name of the BPSP (ii) followed by an asterisk (*) and (iii) the Supplier name, or an abbreviation, (e.g. BPSP name*Supplier name). An Acquirer must ensure that the BPSP or Supplier name remains consistent for all transactions.	Required
Consumer Bill Payment Servicer (CBPS)	The CBPS name must appear with the biller name. The CBPS name must be the Merchant name it registered with Visa. The complete name should appear. An abbreviation may be used for long names, but it must be easily recognizable. The field must contain (i) the name of the CBPS (ii) followed by an asterisk (*) and (iii) the biller name, or an abbreviation, (e.g. CBPS name*biller name). An acquirer must ensure that the CBPS or biller name remains consistent for all transactions.	Required
Service Fee, US Region	Must contain the words "Service Fee" after the Merchant name.	Required
Tipping (Stand-alone Transactions)	When tips are given to the person receiving the tip (service staff) as a stand-alone Visa transaction, Cardholders are unlikely to remember the name of the person to whom they gave the tip or gratuity. The Merchant name field therefore must include something the Cardholder recognizes such as the establishment where the person receiving the tip works. The Merchant name field must also contain the word "Tip". The name of the person receiving the tip is not required. Note: These requirements only apply to tips paid directly to the tipped employee in a stand-alone transaction where the tip represents the entire transaction amount. Example 1: A tip is paid by a Visa cardholder using their Visa card to Alex, who provided valet parking service to the cardholder at a golf club named "Famous Golf Club." The transaction is processed by a tipping solution provider named "NewTip"	Required

	that does not act as, or work with, any payment facilitator. A compliant merchant name field would be <i>“Tip Famous Golf Club”</i>. Example 2: A tip is paid by a Visa cardholder using their Visa card to Alex, who provided valet parking service to the cardholder at a golf club named “Famous Golf Club.” The transaction is processed by a tipping solution provider named “NewPF,” which acts as a payment facilitator. A compliant merchant name field would be <i>“NewPF* Tip Famous Golf Club”</i>. Example 3: A tip is paid by a Visa cardholder using their Visa card to a band named “BestBand” that plays in several different places. The transaction is processed by a tipping solution provider named “NewTip,” which acts as a payment facilitator. A compliant merchant name field would be <i>“NewTip* BestBand”</i>. Note: The requirement to use the word “tip” in the merchant name field is met by the tipping solution provider’s name. Example 4: A tip is paid by a Visa cardholder using their staged digital wallet named “NewWallet,” funded by a Visa card, to a band named “BestBand” that plays in several different places. The transaction is processed by a tipping solution provider named “NewTip,” which does not act as, or work with, any payment facilitator. A compliant merchant name field would be <i>“NewWallet* Tip BestBand”</i>.	
Wire Transfer Money Order Transactions, US Region	Must contain: • The name of the wire transfer operator used to identify itself to its customers. • An asterisk (*) • The Merchant location at which the money order is issued in the remaining positions	Required

Determining a Merchant Location

An Acquirer is responsible for assigning the correct location of each Merchant outlet.

The same location (country) must be disclosed to the cardholder at the time of the transaction (via the website for electronic commerce Merchants, verbally for telephone orders, or on the mail order form); used throughout the transaction life cycle (including but not limited to in the authorization request(s), clearing record, credit transaction, and chargeback record(s)); and be accurately reflected in the VisaNet record and in fulfilling any Merchant reporting requirements.

Card-Present Transactions

For card-present transactions at a Merchant with a fixed location, the Acquirer must assign the location of the Merchant outlet as the location where the transaction took place.

Some Merchants do not operate from a fixed location. For an in-transit transaction, particularly a plane or a ship, the place where the transaction took place is not always clear. Accordingly, the rules specify a choice of places that the Merchant may use as the Merchant location for the purposes of a Visa transaction.

For other Merchants that do not operate from a fixed location (such as a Merchant that travels between different locations), the location must be either the location where the transaction takes place, or the Merchant's principal place of business (the fixed location where a Merchant's executive officers direct, control, and coordinate the entity's activities).

Only the type of Merchant outlet, and not the acceptance device/terminal type, is relevant in determining whether a Merchant is or is not in a fixed location. For example, an electronics Merchant may use mPOS devices inside its store. The store is a fixed location, so the Merchant location must be the address of that store.

Card-Absent Transactions

The location of a card-absent transaction considers additional factors. The cardholder is not present at the Merchant outlet when the transaction takes place, and the activities needed to complete the transaction may occur in different locations, perhaps in different countries.

A card-absent Merchant must disclose the location of the Merchant outlet (and, therefore, of the transaction) to the cardholder at the time of the transaction. An e-commerce Merchant must prominently display the Merchant outlet country to the cardholder on the same screen as the check-out screen or on a page immediately prior to the check-out screen. It must not be contained only via a hyperlink.

A Merchant must use its principal place of business as the Merchant outlet location for card-absent transactions – that is the fixed location where the Merchant's executive officers direct, control, and coordinate the entity's strategy, operations, and activities). A Merchant may have only one principal place of business for it and its group subsidiaries. In the case of a corporate group, the Merchant location is determined at the corporate group level (i.e., as a single entity). For example, this means that a multinational Merchant must use its principal place of business as the Merchant location and may only use the country of a subsidiary if that country qualifies as an *additional* Merchant location.

Under certain conditions a Merchant may also use other countries as Merchant outlets *in addition to* the principal place of business:

- For travel/lodging Merchants, where a travel agent does not conduct the transaction, the Merchant location may be any of the following countries:
 - For airlines, passenger railways, cruise lines, and other travel Merchants, the country from which the first leg of travel originates.
 - For lodging Merchants, the country in which the stay occurs.
 - For car/vehicle rental Merchants, the country in which the vehicle is rented
 - For taxi/ride services, the country in which the journey originates
- For the purchase of travel where a travel agent conducts the transaction, the location of the travel agent determines the Merchant outlet country, regardless of whether the Merchant is the travel agent or the travel Merchant. The rules for other card-absent transactions in the next bullet must be used to determine the location of the travel agent.

- For other card-absent transactions, the Merchant outlet location may also be the country where the Merchant conducts the business activity directly related to the provision of the purchased goods or services to the cardholder. To assign an additional country to a Merchant in this situation, the acquirer must ensure that the Merchant meets all the following criteria:
 - The Merchant has a permanent location where the Merchant conducts business activities and where those accountable for the sale or distribution of the goods or services purchased in the specific transaction decide how products are sold or distributed. The following are not, in themselves, sufficient to satisfy these criteria:
 1. A post office box, a mail-forwarding address, the address of the Merchant's law firm, agent, or vendor, or an email address
 2. The location of a payments function, customer service function, servers or URL, or the presence of a director or investor
 - The Merchant assesses sales taxes on the transaction activity. Such taxes must be assessed on the total amount of the sale of the goods or services. ("Sales tax" is a generic term for a range of taxes levied on the sale, and includes sales tax, good and service tax (GST), and value-added tax (VAT). This condition does not apply when no sales taxes are assessable on the sale according to local law.
 - The location is the legal jurisdiction of the contract that governs the sale of the goods or services (the transaction)

For clarity, if a card-absent Merchant (except in the case of direct sales by a travel/lodging Merchant) qualifies for one or more additional Merchant outlet locations, it may assign an additional location for a transaction only as the location where the underlying business activity occurs *for that specific transaction*.
- Acquirers of digital goods Merchants that qualify for MCCs 5815, 5816, 5817, or 5818 may be granted additional locations after submitting proof of additional relevant business activity to Visa (including, but not limited to, the location of servers).
- Within the European Economic Area (EEA), a Merchant may satisfy the criteria for establishing a card-absent Merchant outlet location if all the relevant business activity occurs within the EEA. That is, the activity must all occur within EEA countries but does not need to occur in a single EEA country. When the qualifying business activity is spread across multiple EEA countries, the acquirer may assign any of those countries as the additional Merchant outlet location. On the other hand, an EEA country may not be used as a card-absent Merchant outlet location if no business activity occurs there, or if there is business activity that is not sufficient to satisfy any of the Visa criteria. For example, an EEA country may be the Merchant location if there are permanent premises at which employees make decisions on what goods are sold and the Merchant pays sales taxes on those goods, even though the jurisdiction for the contract of sale is another EEA country. On the other hand, if a country just has a post box, or it is the location of only payment processing, it may not be used, as these are insufficient to fulfil any criterion.

Payment
Facilitators

A payment facilitator location must be the country of its principal place of business and may be an additional country or countries if all activities specified in the Visa rules occur in each country.

	However, within the Europe Region, the relevant business activity required to establish a payment facilitator location does not need to occur in a single country. If the required activity is spread across multiple Europe Region countries, the Acquirer may assign any of those countries as an additional payment facilitator location. For clarity, all the activities listed in the Visa rules must occur within the Europe Region, and the Acquirer may assign as the payment facilitator location any (or any combination) of the countries in which the required activity occurs. A Europe Region country does not qualify as a payment facilitator location if no relevant business activity occurs there or if the payment facilitator does not have a business license there.
Staged Digital Wallet Operators (SDWO)	A staged digital wallet operator location must be the country of its principal place of business and may be an additional country or countries if all activities specified in the Visa rules occur in each country. However, within the Europe Region, the relevant business activity required to establish an SDWO location does not need to occur in a single country. If the required activity is spread across multiple Europe Region countries, the acquirer may assign any of those countries as an additional SDWO location. For clarity, all the activities listed in the Visa rules must occur within the Europe Region, and the acquirer may assign as the SDWO location any (or any combination) of the countries in which the required activity occurs. A Europe Region country does not qualify as an SDWO location if no relevant business activity occurs there or if the SDWO does not have a business license there.
Marketplaces	The location of a marketplace (as defined in the Visa rules) must be the country of its principal place of business and may be an additional country or countries if all activities specified in the Visa rules occur in each country. Retailers that sell goods or services through a qualifying marketplace may be located in a different country to the marketplace. When that happens, the location of the marketplace must be used to process the transaction.
Ramp Providers	A Ramp Provider location must be the country of its principal place of business and may be an additional country or countries of all activities specified in the Visa rules occur in each country. Conversion Affiliates that sell goods or services via a qualifying Ramp Provider may be located in a different country to the Ramp Provider. When that happens, the location of the Ramp Provider must be used to process the transaction.

Other Location-Related Requirements

Acquirers are responsible for ensuring their Marketplaces, Ramp Providers or Merchants / Sponsored Merchants undergo an adequate due-diligence review to establish the correct Merchant outlet location.

Visa reserves the right to dispute Marketplace or Merchant locations and make a final determination based on the criteria specified in the *Visa Rules* or any other information available to Visa.

Acquirers must ensure that the Marketplaces, Ramp Provider or Merchants they sign are legitimately located in their jurisdiction. Acquirers of card-absent Merchants should look at additional factors (for which a Marketplace, Ramp Provider or Merchant would already have needed to demonstrate to carry out the business activity that enabled the sale) to validate that the Merchant location is genuine, including:

- Any other country of domicile claimed by the Marketplace, Ramp Provider or Merchant / sponsored Merchant
- The country of domicile of the Marketplace, Ramp Provider or Merchant's sponsored Merchant's Agent or Payment Facilitator
- The country¹ most connected to the Marketplace's, Ramp Provider's or Merchant / Sponsored Merchant's website, marketing material, and transaction activity with reference to:
 - The currency selected to settle transactions
 - The language used to explain the terms and conditions.
 - The percentage of international transactions
- The country² of the tax authority in which the Marketplace, Ramp Provider or Merchant assesses sales taxes.
- The legal jurisdiction of any laws to which the Marketplace, Ramp Provider or Merchant is subject.
- The fixed address where the Marketplace's, Ramp Provider's or Merchant's executive officers direct, control, and coordinate the entity's strategy, operations, and activities, or of operational facilities where the Marketplace's, Ramp Provider's or Merchant's core business processes are managed (for example: product development and management, research and development, accounting, finance, human resources, information technology)
- The location of customer support facilities where orders are taken/processed and inquiries/complaints are processed

Examples

Example 1:

A cardholder makes a purchase on board a ferry traveling between Singapore and Malaysia. There is no need to determine in which country's territory the vessel is travelling at the time of the transaction. Under the Visa requirements, the Merchant outlet is an in-transit Merchant outlet, and the Merchant may choose the country where the trip commenced (Singapore), the destination (Malaysia), or the Merchant's principal place of business.

Example 2:

A cardholder purchases an air ticket online from the airline website for travel from the U.S.A. to Japan. The airline is a U.S. airline. In this case, the Merchant outlet location

¹ Within the European Economic Area, acquirers should ensure that these activities occur within an EEA country

² Within the European Economic Area, acquirers should ensure that these activities occur within an EEA country

must be the U.S.A., as it is both the principal place of business for the airline and the place the journey begins.

Example 3:

A cardholder purchases an air ticket online from the airline website for travel from Japan to the USA. The airline is a Singaporean airline. In this case, the Merchant may choose the Merchant's principal place of business (Singapore) or the place the journey begins (Japan).

Example 4:

A cardholder purchases an air ticket from a Canadian travel agent for a flight between Australia and South Africa. The airline is an Australian airline, and the Merchant name in the transaction record is that of the airline. The Merchant location is Canada, as that is the country of the travel agent.

Example 5:

A Merchant headquartered in the U.S.A. hires drivers in Uzbekistan to carry Visa cardholders, competing against taxis. Cards are lodged with the Merchant's app and payment is made as a card-absent payment. The Merchant outlet location must be the USA, which is the Merchant's principal place of business, or Uzbekistan, which is the location where the ride began.

Example 6:

A Merchant using MCC 5817 or 5818 sells software, downloaded through its website. The Merchant's principals work and reside in Manila. Unless Visa approves an exception, the Merchant must use the Philippines as its Merchant outlet location, because that is the Merchant's principal place of business. The same company has a regional hub in Singapore and a call center in Brazil. Both the Singapore and Brazil offices assess sales taxes on software sold. The Singapore office also has people who control the pricing and the product design for sales in Asia, and the jurisdiction for the customer contract is Singapore. The Merchant may use Singapore as an additional Merchant location to sell the goods priced and designed there. Unless Visa approves an exception, Brazil does not qualify as a Merchant location, because the employees there do not manage the development, pricing, and sale of the goods sold in the specific transaction.

Example 7:

A Merchant sells shoes online to consumers all over the world. The Merchant's executive officers work and reside in the UK. The Merchant must use the UK as the Merchant location, because it is the Merchant's principal place of business. The same Merchant has a regional hub in Brazil for all of its Latin America operations and has a local management team and call center staff, determines pricing, determines marketing strategy and conducts marketing campaigns, ships merchandise from a warehouse to all of Latin America, and assesses sales taxes based on Brazilian law. The Merchant may claim Brazil as an additional Merchant location because business activity is occurring in Brazil. Furthermore, because the business activity is occurring in Brazil for all of its Latin America activity, the Merchant may use Brazil as an additional Merchant location for all countries in Latin America.

Example 8:

An ecommerce maple syrup Merchant has its principal place of business in Canada. It has permanent locations in Germany, France, Spain, and the Netherlands. Its France office manages pricing and decisions on which goods are to be sold in Europe. The Spain office manages distribution. German law is the law of the contract, and the company pays VAT in Germany on its European sales. The Netherlands office

processes payments. As the business activity may be spread across multiple EEA countries, and all the required business activity occurs in the EEA, the Merchant may choose to assign its Merchant outlet location to one of the EEA countries in which relevant business activity occurs. In this case, it may choose France, Spain, or Germany. Payment processing activity alone is not sufficient as business activity, so the Merchant may not use the Netherlands. It may not use any other country in the EEA, as there is no relevant business activity.

Example 9:

An online travel agent has its principal place of business in Australia. Its UK office makes decisions on pricing for UK transactions. Its office in Germany manages other aspects of the company’s European sales – deciding strategy and marketing, managing customer relations, and handling disputes. It pays VAT in Germany. Australian law governs the contract of sale for transactions in all countries. The only country that may be used as a Merchant outlet location for card-absent transactions is Australia, as that is the principal place of business. The EEA may not be assigned as a Merchant outlet location, because not all of the required activities occur in EEA countries.

Example 10:

A Ramp Provider has its principal place of business in the U.S. It also has a permanent location in Singapore. It’s office in Singapore oversees the services provided to customers in the AP region, including pricing decisions and unique product options relevant to their local customers. The Ramp Provider has a cryptocurrency license issued by the Singapore regulator, Singapore law is the law of the contract between the Ramp Provider and its customers, and the Ramp Provider pays taxes in Singapore. The Acquirer may assign Singapore as an additional country location as it meets all of Visa’s requirements for assigning an additional Ramp Provider location.

Example 11:

A Ramp Provider has its principal place of business in Luxembourg. It processes transactions on behalf of affiliated third-party cryptocurrency wallets, merchants & NFT marketplaces in various countries, including Canada, Australia, Morocco, Germany, Japan and South Africa. The only country that may be used as a Merchant outlet location is Luxembourg, as that is the Ramp Provider’s principal place of business; the location(s) of third-party affiliates are not relevant for processing transactions

Merchant City

The Merchant city field reflects the city in which the transaction occurred and, for most transactions, must reflect the city in which the Merchant outlet is located.

Visa authorization and clearing systems provide 13 characters in which to place the Merchant city information. Whenever possible, the Merchant city should be completely spelled out and not abbreviated. A clear and discernible city name is required.

For example, use:

S	T		P	E	T	E	R	S	B	U	R	G
---	---	--	---	---	---	---	---	---	---	---	---	---

Do not use:

S	A	I	N	T		P	E	T	E	R	S	B
---	---	---	---	---	--	---	---	---	---	---	---	---

Exceptions

For some transaction types, information other than the city name must or may be included in the Merchant city field:

• **Transactions at a Military Base, Embassy, or Consulate.** If the Merchant chooses to use its home country as the merchant country, the country where the embassy is located must be in the Merchant City name field

- **Card-Absent Transactions**

Must contain the Merchant's customer service telephone number, the Merchant's universal resource locator (URL) or internet/e-mail address

- For the first recurring transaction at the end of a trial period, discounted introductory offer, or promotional period, may contain language or transaction-specific details to help the cardholder identify that their trial period, discounted introductory offer or promotional period has ended, and that the regular price now applies for the subscription

- **Transit Merchant Transactions (MCCs 4111, 4112 and 4131)**

In addition to the Merchant city, may include a telephone number or URL through which the cardholder may obtain transaction information

- **Traveling Merchant Transactions**

May contain an appropriate descriptive phrase, such as:

- SEMINAR
- ONBOARD TRAIN (PLANE) (SHIP)
- HOME SALE
- SERVICE CALL

- Travel Agency Transactions – The Merchant city field may contain the name of the travel agency.
-
-

Merchant State (US Region)

The Merchant state field must include the US state in which the transaction occurred (and, for most transactions, the state in which the Merchant outlet is located).

Traveling Merchants:

When the Merchant outlet is in the 50 United States or the District of Columbia but not a fixed location, include "XX" (for BASE II transactions) or "99" (for Single Message System transactions) in this field.

Military Bases, Embassies, or Consulates:

When the transaction takes place at a US military base, embassy, or consulate located outside the 50 United States and the District of Columbia, include "XX" (for BASE II transactions) or "99" (for Single Message System transactions) in this field.

Merchant Country

The Merchant country field must reflect the country in which the Merchant outlet is located. The correct Merchant country code must be used.

Determining Merchant Category Codes

The Merchant Category Code (MCC) is a four-digit number assigned to describe a Merchant's primary business based on annual sales volume measured in local currency. In addition, some MCCs identify a specific Merchant or type of transaction.

Visa and its members use MCC data for a range of purposes, including activity tracking, reporting, and risk management.

It is an important requirement that Acquirers (and their Agents) assign the correct MCC to each of their Merchants. Visa retains the right to require corrections to MCC assignments and use.

Any transactions representing the purchase of Non-Fungible Tokens (NFTs) should use the MCC appropriate for the type of item purchases or the Merchant's primary business as per Visa's regular MCC assignment rules when permitted.

General Requirements

The following rules apply to the assignment of MCCs:

1. Select the MCC that most accurately describes the Merchant's business. The MCC, in most cases, should reflect the primary type of business in which the Merchant is engaged. If the Merchant has more than one line of business and may qualify for more than one MCC, the Merchant must either:
 - Use the MCC that describes the business with the highest sales volume (measured in local currency) to process all Visa sales
 - Use different MCCs for each line of business.
2. Use "miscellaneous" MCCs (usually ending in "99") only if there is no MCC specific to the Merchant's business. MCC descriptions are very accurate, and Merchants must only be assigned a "miscellaneous" MCC when no other MCC applies to its business.
3. Merchants with multiple Merchant outlets must choose the appropriate MCC for each individual outlet. Electronic commerce websites are Merchant locations in themselves. A Merchant generally has only one e-commerce Merchant location per country, however, acquirers may have multiple websites in the same country if there are different Merchant names or a check-out processes.
4. If there are different businesses operating on the same Merchant premises, each business must be assigned its own MCC if any of the following apply:
 - It operates under a different Merchant name
 - It operates in a distinct area
 - It has separate points of sale.

For example, lodging Merchants often operate other types of businesses on the premises (restaurant, flower shop, gift shop, etc.) with separate business names and payment acceptance devices. These other businesses must use the MCC that describes the specific business operation. For example, a flower shop in a hotel should be classified under MCC 5992 (Florists), whether or not it is affiliated with the hotel property.

5. When applicable, use the unique Merchant-specific MCCs that have been designated for major travel and entertainment (T&E) Merchants. If an airline, car

rental, or lodging Merchant has a Merchant-specific MCC, it must be used for all transactions related to the Merchant's core business. For example, an airline with its own MCC should use that MCC for ticket purchase, baggage fees, upgrade fees, and purchases made on the aircraft. Airline, car rental, and lodging. Merchants that do not have their own MCCs must use the "generic" MCC for that Merchant type: 4511 – Airlines, Air Carriers (Not Elsewhere Classified), 7512 – Car Rental Agencies (Not Elsewhere Classified), and 7011 – Lodging – Hotels, Motels, Resorts, Central Reservation Services (Not Elsewhere Classified).

6. Direct marketing and wholesale club MCCs describe how the Merchant conducts its business rather than what the Merchant sells or provides. For example, a direct marketing Merchant sells through catalogs, brochures, telemarketing, direct mailings, etc. and conducts card-absent transactions. A direct marketing Merchant can sell any type of product or service physical or digital to consumers but must use a direct marketing MCC.
7. For transactions via Ramp Providers, when the cardholder is purchasing non-fiat currency (for example: cryptocurrency) directly from the Ramp Provider, MCC is assigned after the Conversion Affiliate business has been evaluated (or use 6051 Non-Financial Institutions in the case of self-custody wallet load). If the cardholder is paying a Ramp Provider's Affiliate for goods/services, the MCC should be the MCC appropriate for the type of item purchased or the Affiliate's primary business as per Visa's regular MCC assignment rules, when permitted. Also, if the transaction is on behalf of another High-Risk Merchant, then the MCC of that merchant must be used (e.g. for loading a gambling wallet, MCC 7995 must be used and not 6051 as the nature of the transaction is an intent to gamble not to purchase non-fiat currency)

Mandatory Multiple MCCs

There are a number of cases where a Merchant must be assigned multiple MCCs.

- **Automated Fuel Dispensers**

A Merchant that deploys Automated Fuel Dispensers (AFD) must use MCC 5542 (Automated Fuel Dispensers) for AFD transactions. If the Merchant also sells other goods or services, the Merchant must use the appropriate MCC for those transactions.

- **Cash Disbursements at ATMs**

A member that deploys ATMs must use MCC 6011 (Financial Institutions, Automated Cash Disbursements) for ATM cash disbursements. All other transactions (for example, the sale of stamps) at an ATM must use the appropriate MCC.

- **Manual Cash Disbursements**

A member that provides manual (face-to-face) cash disbursements must use MCC 6010 (Financial Institutions, Manual Cash Disbursements) for those transactions. All other transactions at the same Merchant location must use the appropriate MCC for those transactions (such as MCC 6012 (Financial Institutions – Merchandise, Services, and Debt Repayment)).

- **Quasi-Cash transactions including Crypto Currency Sellers**

A Merchant that sells quasi-cash must use MCC 6051 (Non-Financial Institutions – Foreign Currency, Liquid and Cryptocurrency Assets (for example: Cryptocurrency), Money Orders (Not Money Transfer), Account Funding (not Stored Value Load), Travelers Cheques, and Debt Repayment) or MCC 6012 – Financial Institutions – Merchandise, Services, and Debt Repayment for those transactions even if selling quasi-cash is not the Merchant's primary business. Purchases of cryptocurrency must use MCC 6012 or 6051, as applicable. They must also contain special condition indicator 7 and the quasi-cash transaction indicator in the authorization request and special condition indicator 7 in the clearing record. All other transactions at the same Merchant location must use the appropriate MCC for those transactions. Merchant Purchases of NFTs can and often do occur in fiat currency, and as such do not require the use of the cryptocurrency Special Condition Indicator of 7 unless the Visa transaction actually represents the purchase of the cryptocurrency that is immediately used to purchase the NFT.

- **Money Transfer**

Merchants classified with this MCC allow customers to transfer funds via an electronic funds transfer / wire transfer / remittance (both card-present and card-absent locations including on the premises of the Merchant and third-party agents such as casinos, truck stops, or check-cashing storefronts) or via an original credit transaction (e.g., via Visa Direct or Person to Person [P2P] payments).

- **Different businesses in one location**

A Merchant must assign different MCCs to different businesses on the same premises if all of the following apply:

- There are distinct areas in the location for each business.
- Each has its business name / type clearly shown to customers.
- Each business has its own points of sale.

Examples would include a nightclub and restaurant owned by the same company in separate, but adjacent areas; a coffee shop inside a supermarket, with its own

branding and payment system; a restaurant inside a hotel that is in its own separate area and has its own name, branding, and payment system.

- **An electronic commerce site with a link to a different website**
A Merchant that links from its own ecommerce website to another website must use the appropriate MCC for each website.
- **Payment Facilitator:** A payment facilitator is a third party. Accordingly, it must evaluate the business of every sponsored Merchant and assign the MCC most appropriate to the sponsored Merchant's business.
- **Gambling**
In a card-present environment, a Merchant that conducts gambling transactions must use MCC 7995 (Betting, including Lottery Tickets, Casino Gaming Chips, Off-Track Betting, Wagers at Race Tracks and games of chance to win prizes of monetary value) for those transactions. If the Merchant also sells other goods or services, it must use the appropriate MCC for the other services.
- Card-absent environment: If the Merchant conducts online gambling transactions, however, it must use MCC 7995 for all transactions, even if gambling is not the Merchant's primary business.
- US Merchants: Lottery and gambling transactions that qualify for MCC 7800, 7801 and/or 7802 must use the applicable MCC for all transactions even if gambling is not the Merchant's primary business. If the Merchant also sells other goods or services, it must use the appropriate MCC for the other services.
- **Multiple lines of business, one or more of which is considered "high integrity risk"**

A Merchant that has multiple lines of business in the same location must assign a high integrity risk MCC to the line of business that is considered high integrity risk and another MCC to other businesses that are not considered high integrity risk. Current high integrity risk MCCs are:

For all Card-Absent transactions using the following MCCs:

- 5122 (Drugs, Drug Proprieties, Druggist Sundries)
- 5912 (Drug Stores, Pharmacies)¹
- 5966 (Direct Marketing – Outbound Telemarketing Merchants)
- 5967 (Adult Content and Services)
- 5993 (Cigar Stores and Stands)¹
- 7273 (Dating and Escort Services)
- 7995 (Betting, including Lottery Tickets, Casino Gaming Chips, Off-Track Betting, Wagers at Race Tracks and games of chance to win prizes of monetary value)

For certain Card-Absent Transactions using the following MCCs:

- 4816 (Computer Network/Information Services), for the sale of access to cyber lockers or remote digital file-sharing services
- 6211 High Integrity Risk Financial Trading Platforms (card absent)
- 5968 Subscription "Negative Option" Merchants (card absent)
- 5816 (Digital Goods – Games), for Transactions involving skilled game wagering (for example: daily fantasy sports)
- 6051 and 6012 Crypto Merchants: exchanges, wallet providers or on-ramp providers

(card absent) with transactions required to use Special Condition Code 7

1 In the AP Region, Canada Region, CEMEA Region, Europe Region, LAC Region: Applies only if the Merchant conducts transactions other than domestic transactions

Non-Fiat Currency Acquisitions

Acquisitions of non-fiat currency (example: cryptocurrency) must use MCC 4829, 6012, 6051, or 6540 as applicable. They must also contain the applicable special condition indicator, depending on the type of non-fiat currency being acquired, in the authorization message and in the clearing record. Purchases of NFTs require the use of the cryptocurrency special indicator (4).

•Ramp Provider: A Ramp Provider is a third party. Accordingly, it must evaluate the business of every Conversion Affiliate and assign the MCC most appropriate to the Conversion Affiliate’s business.

Optional Multiple MCCs	If a Merchant or marketplace sells more than one type of merchandise or has more than one line of business, it must use the MCC that best describes the business with the highest sales volume (measured in local currency) to process all Visa sales. The acquirer and the Merchant may determine that an additional MCC and Merchant or marketplace identifier is appropriate for each different line of business. A Marketplace that sells multiple lines of goods may use MCC 5262 (Marketplaces). Visa strongly recommends that the MCCs assigned to Merchants are reviewed periodically to ensure accuracy in order to limit potential compliance complaints
Examples of Multiple MCCs	Example One: A Merchant sells books, stationery, and newspapers, and also has a music CD department. Book sales make up the majority of the Merchant’s business, so the correct MCC is 5942 (Book Stores). Example Two: A Merchant operates a restaurant and nightclub. In the restaurant, which is upstairs, customers are served dinner; the nightclub, which is downstairs, charges a cover and serves drinks. Each floor has its own business name on the door, and they have separate places to pay and separate acceptance device. The Merchant must use two different MCCs: 5812 (Eating Places, Restaurants), and 5813 – (Drinking Places (Alcoholic Beverages), Bars, Taverns, Cocktail Lounges, Nightclubs, and Discotheques). Example Three: A Merchant operates a beauty salon that sells hair products in the front of its store, and a day spa in the rear of the building. Both businesses use the same DBA name, and both operate using the same acceptance device near the front door of the shop. Initially, the salon did the majority of the business, using MCC 7230 (Beauty and Barber Shops). Recently, the spa has generated more in sales, and the potential for growth is apparent. For this business, the Merchant now has two choices: • Change MCC to reflect the change in business and use 7298 (Health and Beauty Spas) as the only MCC • Continue to use 7230 (Beauty and Barber Shops) for the salon, and use a separate acceptance device for the spa, using 7298 (Health and Beauty Spas). If the spa uses its own name and starts using its own acceptance device, the Merchant must use both MCCs. Example Four: A local county government office allows community members to pay for property taxes with a Visa card, using MCC 9311 (Tax Payments). The county also owns and operates

a ballpark and accepts registrations from the youth athletic leagues. The government office would like to use the same MCC for both situations. Based on the specificity of MCC 9311 for tax payments, it is inappropriate for the county to accept the ballpark registrations using this MCC. In this example, the office must use 9399 (Government Services, not elsewhere classified) because it is a payment to the county government that does not fall under any other government related MCC.

Example Five:

John's Walk and Carry sells shoes and luggage on the internet. The majority of goods sold through the website are shoes, so the Merchant must use MCC 5661 (Shoe Stores). The Merchant may also use 5948 (Luggage and Leather Goods Stores) even though it is only required to use the one MCC for this Merchant outlet. If the Merchant decides to split the different businesses into different websites with separate check-out processes but with links between the sites, they are now considered two different Merchant outlets and must now use different MCCs to reflect the different businesses.

Example Six:

A service station uses AFDs to sell fuel on the forecourt and permits patrons to pay for petrol inside as well. The service station also sells a small amount of oil, drinks and snacks. The Merchant must use 5542 (Automated Fuel Dispensers) for the AFD sales, and 5541 (Service Stations with or without Ancillary Services) for their non-AFD sales.

Example Seven:

A Cardholder wants to acquire Bitcoin (BTC). They visit a Ramp Provider directly and use their Visa card. They acquire the Bitcoin which is sent to their crypto wallet. The Ramp Provider must use MCC 6051 for the transaction as the transaction involves the acquisition of non-fiat currency and the Ramp Provider is not a financial institution. Another day, the Cardholder visits their bank's website with the intention of acquiring a tokenized short-term bond. The bank acts as the Ramp Provider and the Cardholder uses their Visa Card and acquires the tokenized bond. The bank acting as the Ramp Provider must use MCC 6012 as the transaction involves the acquisition of non-fiat currency and the bank is a financial institution.

Example Eight:

A Cardholder visits a Ramp Provider to acquire Solana (SOL). They use their Visa card, acquire the Solana with intent to load a general-purpose crypto wallet. The Ramp Provider must use MCC 6051 as the transaction involves the acquisition of non-fiat currency and it is not a financial institution. Another day, the Cardholder visits another Ramp Provider to acquire Ethereum with intent to gamble. The Cardholder uses their Visa card with the Ramp Provider who has an Affiliate where they send the Ethereum to in order to complete the Cardholder's transaction. The Ramp Provider must use the MCC that best describes the Affiliate's primary business as the Cardholder is paying the Affiliate for goods/services (e.g., in this case MCC 7995)

Section 2: Merchant Category Code Listing

MCCs are listed in numeric order with a full definition for each MCC.

The MCCs and descriptions have been derived from Standard Industrial Classification (SIC) Codes and the International Organization for Standardization (ISO) Codes. Please note that Visa MCCs and SIC codes do not always correspond. In many cases, Visa has consolidated several SIC codes into one MCC to manage the number of MCCs. In other cases, such as for T&E and direct marketing Merchants, Visa established MCCs that do not have corresponding SIC codes.

MCC	MCC Title/ MCC Description	Included in this MCC	Similar Merchants
0742	Veterinary Services		
	Merchants classified with this MCC are licensed practitioners of veterinary medicine, dentistry, or surgery. This MCC includes medical practitioners of pets (e.g., dogs, cats), livestock (e.g., cattle, horses, sheep, hogs, goats, poultry), and large or exotic animals.	Animal Doctors, Pet Hospitals Pet Clinics Services – Veterinary	5995 – Pet Shops, Pet Foods and Supplies Store
0763	Agricultural Co-operatives		
	Merchants classified with this MCC provide farm management services or engage in farming operations. Also included in this MCC are associations and cooperatives that provide assistance and services to farmers in farm management. These services include, but are not limited to financial assistance, management or complete maintenance of crops, soil preparation, planting and cultivating, aerial dusting and spraying, disease and insect control, weed control, and harvesting crops.	Farm Management Services Orchards Vineyards	0780 – Landscaping and Horticultural Services 4225 – Public Warehousing and Storage – Farm Products, Refrigerated Goods, Household Goods, and Storage
0780	Landscaping and Horticultural Services		
	Merchants classified with this MCC provide landscape planning and design services. This MCC also includes Merchants that offer a variety of lawn and garden services (e.g., planting, fertilizing, mowing, mulching, seeding, spraying, sod laying).	Gardening Services Horticulture Services Landscaping Services	5193 – Florist Supplies, Nursery Stock and Flowers 5261 – Nurseries and Lawn and Garden Supply Stores
1520	General Contractors – Residential and Commercial		
	Merchants classified with this MCC are general contractors primarily engaged in construction of residential and/or commercial buildings. This MCC includes contractors that perform new construction as well as remodeling, repair, additions, or alterations.	Building Contractors – Residential, Commercial Construction Companies General Contractors	1711 – Heating, Plumbing, and Air Conditioning Contractors 1731 – Electrical Contractors 1740 – Masonry, Stonework, Tile Setting, Plastering and Insulation Contractors 1750 – Carpentry Contractors 1761 – Roofing, Siding, and Sheet Metal Work Contractors 1771 – Concrete Work Contractors 1799 – Special Trade Contractors (<i>Not Elsewhere Classified</i>)
1711	Heating, Plumbing, and Air Conditioning Contractors		
	Merchants classified with this MCC are contractors that provide heating, plumbing and air conditioning services. This MCC includes contractors that perform air system balancing and testing, drainage system installation, furnace repair, irrigation system installation, refrigeration and freezer work, sewer hookups and connections, solar heating, sprinkler system installation and water pump installation and	Air Conditioning Contractors Heating Contractors Plumbing Contractors	1520 – General Contractors – Residential and Commercial 5074 – Plumbing and Heating Equipment and Supplies 1799 – Special Trade Contractors (<i>Not Elsewhere Classified</i>)

⁴ Effective May 1, 2025, Acquirers must assign ISO's MCC 5723 to all retailers in California, Colorado and New York that meet the definition of a "firearms merchant" under applicable law. Under the Visa Rules, each Member is responsible for complying with all applicable laws, including any laws regarding the assignment of MCCs. In the event of any conflict between the Visa Rules and this Manual and any applicable laws or regulations, the requirements of the laws and regulations govern. For any questions, please contact your Visa Client Services representative.

Section 3: New MCC or MCC Change Requests

To request a new MCC or changes to an existing MCC, members must submit to Visa a completed *Visa Merchant Category Code Request Form* ([./visa-merchant-category-code-request-form.pdf](#)), which is also available on Visa Access. Visa will notify the member when a decision is made. If approved, the new MCC will be included to a future edition of the *Visa Merchant Data Standards Manual*.
